10PROPOSE THE DRAFT M.O.U. being proposed by the FDA. In particular,
10OBJECT to the definition of "inordinate amount" which restricts the availability
and the right to obtain medically necessary compounded medications by limiting
the number of prescriptions that can be shipped across state lines from specialized
compounding pharmacies.

COMMENTS: I have suffered many problems with
menopause and finally have things
under control because of hormones being
specifically made for my level of hormone.
I feel better than I have for years and
through the right hormone I no longer
retain fluid and have finally been able
to take off excess weight gained while on
traditional hormones. I feel a person should
have the right to choose what is best for them
and not be forced by some political organization
to have only available what they feel I
should have. Where is freedom of choice?
